## • ABOUT ME

I am a computer engineer with experience in agile methodologies. I always strive to present my perspective objectively, thus facilitating informed decision-making and achieving an optimal result. Since I discovered React.js, I have loved designing websites with this library, and in my free time, I enjoy programming for fun.

## • WORK EXPERIENCE

**Full-stack web developer**

**Upbirk, April 2023 - August 2023 (5 months)**

**My main responsibilities were:**

- Front-end development using React to generate components in the views, supported by Material UI in the styling process.
- Back-end development using Node.js + Express.js for building REST APIs.
- Experience using PostgreSQL with the Knex.js ORM to manage migrations, seeds, and SQL queries in the project.
- Participation in the development process using the AGILE methodology in collaboration with the IT team.

## • SKILLS

**I have knowledge in:**

• HTML • SCSS • JavaScript • Database administration and querying, specializing in Transact SQL (SQL Server - MySQL - PostgreSQL) • Node.js • PHP 8 • React • GIT

• Intermediate-level proficiency in Linux systems based on Debian distributions

# • ABILITIES

**The following skills best describe me as a professional:**

- Teamwork
- Resilient
- Motivated
- Goal-oriented
- Empathetic
- Respectful
- Patient
- Responsible
- Competent

# • ADDITIONAL INFORMATION

**Nationality:** Chilean

**Date of birth:** May 14, 2001

# • LANGUAGES

**English - Intermediate level**

**Spanish - Native**

# • EDUCATION

**DuocUC Professional Institute**

Completed university degree.
Graduated in 2023 with a degree in Computer Engineering.

**Talagante Commercial High School**

Completed high school education.
Completed in 2019 with a specialization in Human Resources.
